INDEX OF VOLUME 5

Anderson, R. D., and Hamstrom, M. E. *A note on continuous collections of continuous curves filling up a continuous curve in the plane*, 748.

Apostol, T. M. *Some series involving the Riemann zeta function*, 239.

Arens, R., and Singer, I. M. *Function values as boundary integrals*, 735.

Bagemihl, F., and Sprinkle, H. D. *On a proposition of Sierpiński's which is equivalent to the continuum hypothesis*, 726.

Ball, B. J. *Countable paracompactness in linearly ordered spaces*, 190.

Barry, J. Y. *On the convergence of ordered sets of projections*, 313.

Basu, S. K. *On hypergeometric summability involving infinite limits*, 226.

Birkhoff, G., and Kotik, J. *Note on the heat equation*, 162.

Blackburn, F. J. See Mann, W. R.

Blackwell, D. *A representation problem*, 283.

Bledsoe, W. W., Norris, M. J., and Rose, G. F. *On a differential inequality*, 934.

Blum, E. K. *The Euler-Poisson-Darboux equation in the exceptional cases*, 511.

Blum, J. R., *Two theorems on almost sure convergence*, 253.

Bonsall, F. F., and Marden, M. *Critical points of rational functions with self-inversive polynomial factors*, 111.

Brenner, J. L. *A bound for a determinant with dominant main diagonal*, 631.

Burgess, C. E. *Some theorems on n-homogeneous continua*, 136, 1001.

Butzer, P. L. *On the extensions of Bernstein polynomials to the infinite interval*, 547.

Carleson, L. *proof of an inequality of Carleman*, 932.

Carlitz, L. *A theorem of Ljunggren and Jacobsthal on Bernoulli numbers*, 34.

—— *Note on irregular primes*, 329.

—— *Dedekind sums and Lambert series*, 580.

Chamberlin, E., and Wolfe, J. *Note on a converse of Lucas's theorem*, 203.

Churchill, R. V., and Dolph, C. L. *Inverse transforms of products of Legendre transforms*, 93.

Clatworthy, W. H. *A geometrical configuration which is a partially balanced incomplete block design*, 47.

Clifford, A. H. *Bands of semigroups*, 499.

—— *Note on Hahn's theorem on ordered abelian groups*, 860.

Cohen, E. *A finite analogue of the Goldbach problem*, 478.

Cohn, H. *The density of abelian cubic fields*, 476.

Conrad, P. *On ordered division rings*, 323.

Cooperman, P. *On a variational problem having a third order differential equation as a necessary condition for an extremum*, 309.

Cronin, J. *Topological degree of some mappings*, 175.

Curtis, C. W. *A note on the representations of nilpotent Lie algebras*, 813, 1001.

Curtis, M. L. *A note on monotone deformation-free mappings*, 437.

Davis, R. B. *A special case of the normal derivative problem for a third order composite partial differential equation*, 720.

Dekker, J. C. E. *A theorem on hypersimple sets*, 791.

Derman, C. *A solution to a set of fundamental equations in Markov chains*, 332.

Deskins, W. E. *A radical for near-rings*, 825.

Devinatz, A. *A note on semi-groups of unbounded self-adjoint operators*, 101.

Dickinson, D. *On Lommel and Bessel polynomials*, 946.

Dolph, C. L. See Churchill, R. V.

INDEX OF VOLUME 5

Anderson, R. D., and Hamstrom, M. E. *A note on continuous collections of continuous curves filling up a continuous curve in the plane*, 748.

Apostol, T. M. *Some series involving the Riemann zeta function*, 239.

Arens, R., and Singer, I. M. *Function values as boundary integrals*, 735.

Bagemihl, F., and Sprinkle, H. D. *On a proposition of Sierpiński's which is equivalent to the continuum hypothesis*, 726.
